BIOS | BRITISH AND IRISH ORTHOPTIC SOCIETY

VISION FOR YOUR FUTURE

Orthoptists are specialists in how the eyes move and work together

They link the development of eyesight with how the brain controls the eyes. It's cutting-edge stuff and makes a huge difference to patients' lives. If you enjoy science and want a career that matters, orthoptics could be for you.

SCAN ME!

Orthoptics isn't just the theory and clinical skills you learn from a textbook or in a university but it is an opportunity to bring your personality to a career as well. Patients respond best when an Orthoptist shows a genuine, human and compassionate side.
